

DR. GILLILAND-2ND INTERVIEW-NOV 9, 92

B: "This is Brad Shellady calling back. We spoke last Thursday."

G: "Yes."

B: "I came across a couple more things I was wondering if you would answer for me?"

G: "Certainly."

B: "Was the skeleton of Freida Powell complete?"

G: "I don't remember. Do you have a copy of the report?"

B: "Yes."

G: (Irritated) "What does it say?"

B: "I really can't make it out."

G: (Irritated) "Does it say it's a complete human skeleton?"

B: "No. Would it say complete?"

G: "It would say complete."

B: "Then it is correct to say it was a partial?"

G: "Right."

B: "What was the method of superimposition used?"

G: "That was done later. Dr. Matthews and I did that years later."

B: "What method was used for that?"

G: "He took a photograph of the young woman and a photograph of the skull and literally double exposed."

B: "Your saying that he laid Frieda's picture over a picture of the skull and then found what reference points he could is that correct?"

G: "Yes."

B: "What was your interest in doing it years later?"

G: "We were interested in the process and had gotten better at it. The doctor said "I could do that." I said "Oh yea?" He said "Yea." And so we did."

B: "Was the case then picked at random for this?"

G: "Oh, it's always been an interesting case to me. That's close to at random. It was not prompted by any external event."

B: "How do you spell the name of the doctor that was working with you?"

G: "B-E-S-A-N-T; M-A-T-T-H-E-W-S. Since it was informal he may, or may not have any independent recollection of this activity. His phone number is (214) 385-2200."

B: "Could I get your first name please?"

G: "M.G.F. Try not to surprise me with a subpoena. It really irritates me."

B: "I will not do that."

G: "Because like I said, I really think he's good for this one."

B: "Thank you very much."

G: "Goodbye."

(END OF INTERVIEW)
