

I William Sprung responded to the fire on Angel Fire Dr. on truck 484. Upon arrival I was one of the first to apply water on the shed. I was at the nozzle of the hose. We approached the south side which was the door side. I noticed it was already burnt. To gain entry we went to opposite side which was the north side. We then knock the wall down to apply water inside of shed. At this time I was advised there might be one child in shed. While hosing down inside I was told child was found to the right of me. At this time I was instructed to apply water when told. A few minutes later they told me a second child was found. When Connally/Compton arrived they asked for volunteers to help them. I volunteered to help, we then place the children in body bags.
